Education

NED University of Engineering and Technology — Karachi, Pakistan
Bachelor of Engineering in Software Engineering — *Oct. 2023 – Present*

Experience

Software Engineer Intern — Aug. 2026 – Sept 2026
Jaffer Business Systems — *Karachi, Pakistan*

- Developed a full-stack **Transportation Management System (TMS)** using Next.js, NestJS, PostgreSQL, and TypeORM for shipment, carrier, quote, load, and dispatch management.
- Implemented external carrier quoting, PDF/CSV shipment imports, REST APIs, role-based authentication, and end-to-end shipment workflows.

React TypeScript Developer — Feb. 2026 – Jun. 2026
Shifted Sol — *Karachi, Pakistan*

- Built a Western Audiology ERP frontend with React.js, TypeScript, and shadcn/ui.
- Delivered analytics dashboards using TanStack Table and Recharts, eliminating manual clinic reporting workflows.
- Integrated RESTful APIs with type-safe TypeScript.

Projects

GreenBuddy - AI Plant Diagnoser | *Python, EfficientNet, RAG, Gemini API, React Native, FastApi* — Feb 2026 – Apr 2026

- Trained an image classification model on the **PlantVillage dataset** to recognize plant diseases through leaf morphology.
- Architected a **Retrieval-Augmented Generation (RAG)** pipeline using the **Gemini API** to query localized treatment strategies.
- Delivered structured recommendations spanning organic remedies and precise chemical applications directly to farmers.

HomeFit - AR-Based Furniture App | *React Native, Node.js, MySQL, Firebase, Stripe* — Oct 2025 – Nov 2025

- Allows users to preview furniture in their living space using **AR**, ensuring accurate scale and placement.
- Automatically transforms standard **2D images** uploaded by sellers into interactive **3D models**.
- Integrated **Stripe Connect** for seamless, secure end-to-end payment processing between buyers and sellers.
- Features a dedicated web-based admin panel to oversee users, seller accounts, and product listings.

SmartWear - Real-Time Glasses Filter | *Python, OpenCV, NumPy, Haar Cascades* — Jan 2026 – Feb 2026

- Developed a real-time cv application that detects facial structures to automatically overlay digital eyewear directly onto a user face.
- Engineered image processing logic to automatically scale, rotate, and blend 2D asset overlays over eye regions, perfect alignment during movement.

Blogger | *Gemini API, React.js, Node.js, Express.js, MongoDB, Firebase* — Jul 2025 – Jul 2025

- Built a full-stack blogging platform with a RESTful architecture, implementing Firebase with JWT session handlers.
- Integrated the **Google Gemini API** for smart AI blog generation, automated title hooks, and content improvements.

PDF-to-Quiz Generator | *React, JavaScript, Gemini API, Tailwind CSS* — Feb 2025 – Feb 2025

- AI-driven app that converts PDF text into structured summaries and interactive review quizzes via the **Gemini API**.
- Designed a lightweight, responsive UI featuring a **no-login architecture** for immediate target user engagement.

Certifications

Introduction to Deep Learning with PyTorch | *DataCamp* — Jan 2026

- Completed technical certificatiosn in Deep Learning focusing on building and training neural networks. **(CPE: 3)**

React JS Web Development - The Essentials Bootcamp | *Udemy* — Jul 2025

- Mastered component-based architecture, hooks, and responsive structures to build robust web systems.

Technical Skills

Languages: JavaScript, TypeScript, Python, Dart, C/C++, C#, SQL, HTML/CSS
Frameworks & Libraries: React, React Native, Next.js, Node.js, Express.js, FastApi, Tailwind CSS
Databases & Tools: VectorDB, Rag, MySQL, MongoDB, Firebase, Git, Docker, Vercel, LLMs, Stripe
